

## The Power of Experience Camp & Christian Education

We learn best what we live. Camp gives young people genuine immersions in Christian community, faith and practice. Children and youth long to experience the love of God not simply talk about it. Discipleship comes alive in relationships and daily rhythms of camp.

Experiential faith formation often becomes a pivotal catalyst for Christian commitment and calls to life-long ministry and mission. In fact, the National Study on Youth and Religion reveals that those who attend faith-based camps are three times more likely to continue involvement in faith communities as they move into adulthood.

Please give generously to the Christian Education Offering. You will make a significant difference in the life and faith journey of young people who otherwise could not afford to participate. This is a particularly important year for giving as some families continue to have extra financial needs right now.
